Subject: Follow-up: Your appointment on March 16 —Billing & Prescription

Hi James,

This is a reminder for your appointment this Thursday, March 16 at 10:30 AM.
Please bring your insurance card. Your current diagnosis of Type 2 Diabetes (ICD-10: E11.9) and Hypertension (ICD-10: I10) will be reviewed. Dr. Reyes will also discuss your recent bloodwork results.

For billing, your account #447-882-19 has a balance of \$340.00. Please call our office at (217) 555-0192 to arrange payment. Your SSN on file: 489-72-1834.

—Sandra Reyes, MD | Urbana Family Practice | dr.sandra.reyes@uihealth.edu

SUMMARY

A medical provider sent a patient a reminder for an upcoming appointment. The message covered review of two ongoing chronic health conditions, discussion of recent test results, an outstanding billing balance, and contact instructions for payment. No identifying details retained.

FW: elevator shop phones are less than ideal From: "Erickson, Keith R (O&M)" <kerricks@university-of-illinois> To: "Brewer, Michael K (O&M)" <mkbrewer@oandm.uiuc.edu> Date: Wed, 25 Apr 2001 2:03:34 -0000 ----- From: Miller, Jeffrey B (O&M) <Elev> Sent: Wednesday, April 25, 2001 2:03:34 PM To: Vaughn, James R (O&M); Wasal, Carl V (O&M) Cc: Erickson, Keith R (O&M) Subject: FW: elevator shop phones are less than ideal Auto forwarded by a Rule Today's cell phone history 9 cell phone call attempts 1 successful connection -----Original Message----- From: Miller, Jeffrey B (O&M) <Elev> Sent: Wednesday, April 25, 2001 1:34 AM To: Angela E Adams (O&M) (E-mail); Elizabeth Eades (E-mail); Regina Smith (E-mail); Sandra Washington (E-mail); Vicki Creedy (E-mail) Subject: elevator shop phones are less than ideal I have been receiving a lot of rumbling from the guys about their cell phones. And I don't blame them----- Let's try something new. you may already be doing this but Please call all calls out on cell phones first (for the guys with cell phones) If you can't get through on the cell phone, please use the email system or super pager system and write them a short note "north car isn't working" or "blood running out of south car new music" or "problems at FAR call service office" something like that, short and direct but then add, "call service office" so we know they got the call. If you find they are not calling you and letting you know that they got the call please let me know. We have had (a few) but too many instances where we get a work order at night and nobody knew anything about it. I realize it is too easy to forget if someone called with confirmation or that you are waiting for confirmation, but if we only page out the call and don't ask for confirmation then we have no idea if anyone got it or not, so this is better than nothing. 8 out of 10 times I try to use these cell phones I can't get through and it is even more aggravating for the guys to use. When using their papers it works out well if they know what the call is when they look it rather than having to call the service office first to find out what the call is. They might be driving by the building when their pager goes off and if all they see is the service office phone number, then they have to find a phone to use and go back to the building they just drove past. Let me know if this isn't realistic or if there is a better way to do it. thanks Jeff	FW: elevator shop phones are less than ideal From: "Erickson, Keith R (O&M)" <kerricks@university-of-illinois> To: "Brewer, Michael K (O&M)" <mkbrewer@oandm.uiuc.edu> Date: Wed, 25 Apr 2001 -0000 ----- From: Miller, Jeffrey B (O&M) <Elev> Sent: Wednesday, April 25, 2001 PM To: Vaughn, James R (O&M); Carl V (O&M) Cc: Erickson, Keith R (O&M) Subject: FW: elevator shop phones are less than ideal Auto forwarded by a Rule Today's cell phone history 9 cell phone call 1 successful connection -----Original Message----- From: Miller, Jeffrey B (O&M) <Elev> Sent: Wednesday, April 25, 2001 AM To: Angela E Adams (O&M) (E-mail); Elizabeth Eades (E-mail); Regina Smith (E-mail); Sandra Washington (E-mail); (E-mail) Subject: elevator shop phones are less than ideal I have been receiving a lot of from the guys about their cell phones.
